

ODEMSA DRUG KIT CONTENTS - 2nd and 3rd Tier Medication Alternatives

Drug and other medical product shortages have the potential to adversely affect patient care by delaying treatment or forcing the use of second-choice products. Nationwide drug shortages are now a daily event that impact the care we as providers are able to give. This is a significant public health problem that deserves the concentrated efforts of everyone in the industry. As EMS providers, we know you want the best possible medication options for your patients. In this regard, ODEMSA continues to work with the OMD's and Pharmacists in our region to address these shortages and wherever possible, provide you with secondary (2nd tier) and tertiary (3rd tier) medication alternatives. Medication questions should be addressed with your agency's OMD.

➤ EMS providers, pay close attention to the **MEDICATION ALERT CARDS** placed on top of the drug kits, and reference the tables below.
