Old Business:		
State Report	The State continues to work on statewide CARES rollout; there is a lot of data integration but theoretically everyone involved in the care of the patient will be able to have data from the time the call drops to EMS to patient discharge; it was already supposed to be live but rollout can be anywhere between 12-18 months is the best “guess-timation”; VCU has already begun the data sharing process	
Mission Lifeline Action Registry Data	N/A	
New Business:		
STEMI Workgroup	Dr. Kontos will work on refining the protocol and will try to send it out to the group in the next couple of weeks; looking at national and international data, it shows the sooner a patient is placed on ECMO, the better the patient outcome; will focus primarily on witnessed VT/VF	Motion:
Business from the floor	N/A	
Next Meeting	October 26th, 2023	
Adjourn	The workgroup adjourned at 0840 am.
