	<p>Respiratory assessment – no comment</p> <p>Lights and sirens – Tom Ludin advised this data point is a special project for NEMSQA; Dr. Yee advised the numbers look decent but wants to break out TO SCENE and FROM SCENE use of lights and sirens</p> <p>Status epilepticus – look at breakdown of status vs seizures with return to baseline and see what the dropdown is asking for</p> <p>Pain Assessment – how is this documented? Pain score or under assessment tab or is it in the narrative</p> <p>Pain effectiveness – documentation can be an issue</p> <p>Trauma Patients transferred to trauma center – may be a documentation measure; work on this data point</p>
